CANCER
REPORT

LAFAYETTE

Franciscan HEALTH
CANCER CENTER

Introduction to the Franciscan Health Lafayette Cancer Annual Report

It is my pleasure to introduce the Franciscan Health Lafayette Cancer Program annual report. As you explore the information provided here, you will discover that we offer a level of technology and medical expertise that rivals that of a “big city” cancer center. Our patients experience a deeply rooted and personal level of commitment and compassion, as well as advanced cancer care provided by specialists who are as skilled at treating the person as they are at treating the disease.

When someone learns they have cancer, it can trigger an avalanche of emotions and questions. Our team of expert professionals and ancillary staff are here to partner with our patients on their journey. We offer research based care as well as nationally approved treatment planning, allowing our patients the option to stay local for their treatment and close to family support systems.

Our oncology program continues to receive the seal of approval from the Commission on Cancer and American College of Surgeons as a top performer in delivering high quality, interdisciplinary care to our cancer patients. A successful cancer treatment plan demands that we put the most advanced resources into the hands of highly skilled diagnosticians.

We are pleased to continue our lung screening program. Individuals who have a high risk of developing lung cancer but no signs or symptoms of the disease undergo low-dose computed tomography (LDCT) scanning of the chest. We have lowered the cost of screening to \$49. We utilize 3D mammogram technology, which offers fewer false positives and up to 15 percent better detection.

As technology advances the early diagnosis and treatment of cancer care, we plan to remain on the cutting edge to provide our patients the very best in cancer diagnosis and treatment close to home.

Sincerely,
Dr. Richard Rosales
Chairman
Franciscan Health Cancer Center Lafayette

CANCER SERVICES

Franciscan Health Lafayette offers a variety of cancer care services to meet the physical and emotional needs of our patients and their families and support them on their wellness journey.

- Screening and early detection for breast, lung, colorectal, skin, and prostate cancers
- Laboratory
- Resources and education
- Outreach Events
- Spiritual Care
- Palliative Care
- Rehabilitation Services
- Nutrition Education

The medical staff- supported by a wide range of ancillary medical professionals- provides exceptional care for each patient. Our Core team includes:

- Chemotherapy Certified nurses (18 total 3 with oncology certification, 1 with doctoral prepared nurse practitioner)
- 9 nurses completed their ONS Chemotherapy Biotherapy Course
- 3 Oncology Nurse Navigator
- Pharmacist
- Social Workers
- Case Manager
- Dietician
- Palliative Care

2018 HIGHLIGHTS, INITIATIVES AND ACCOMPLISHMENTS

- Continued participation in the Commission on Cancer RQRS Rapid Quality Reporting System for more concurrent analysis of cancer incidence and treatment patterns for internal and national comparisons
- Ongoing compliance of Commission on Cancer standard of care measures for treatment by site and stage.
- Radiology added a positron emission tomography (PET) scan to their department. A PET scan is an imaging test that allows your doctor to check for diseases in your body. The scan uses a special dye containing radioactive tracers.
- Endobronchial ultrasound (EBUS) is a minimally invasive but highly effective procedure used to diagnose lung cancer, infections, and other diseases causing enlarged lymph nodes in the chest, was added to our facility.
- Opened a new Cancer Center in April, 10 chairs and dedicated pharmacist
- Worked with the American Cancer Society to be a host site for the survivorships program Look Good Feel Better.

CANCER PREVENTION PROGRAM

- Genetic Event- Decoding Annie Parker October 2018
- Healthy Lung Talk September 2018
- Aspire Program for Tobacco Cessation Ongoing

CANCER SCREENING PROGRAM

- Mammogram Monday was a partnership with Franciscan and local companies to have a dedicated day for their employee to get a mammogram.
- Lung Cancer Screening \$49
- Partnership with the YWCA to provide free breast and cervical screening in 23 surrounding counties.

CANCER SCREENING PROGRAM

- Support Group for Patients
- Support group for Caregivers
- American Cancer Society Look Good Feel Better Programs
- Relay for Life

FRANCISCAN HEALTH LAFAYETTE CANCER REGISTRY REPORT

The Cancer Program is accredited by the American College of Surgeons Commission on Cancer and is staffed by a certified cancer registrar. The Registry maintains cancer data and follow-up on patients diagnosed and/or treated at Franciscan Health Lafayette. This data is reported to both the Indiana State Department of Health Cancer Registry and the American College of Surgeons National Cancer Data Base.

In 2018, there were 474 (class 00 to class 22) cases accessioned. These cases were used in the statistical analysis of the 2019 Franciscan Health Lafayette Cancer Annual Report. The top five diagnoses for men were lung, colorectal, esophagus, melanoma, and lymphoma. The top five diagnoses for women were breast, lung, colorectal, endometrial and lymphoma.

Franciscan Health Lafayette Cancer Registry currently maintains follow-up on approximately 4215 patients. Lifetime follow-up is collected on all analytic cases to compare treatment outcomes and survival rates. The Registry consistently maintains a lost-to-follow-up rate of 10 percent or less as mandated by the American College of Surgeons Commission on Cancer.

Studies completed in 2017:

Lung Cancer NCCN: 2017 Non-Small Cell Lung Cancer Treated in Concordance with NCCN Guidelines

(Dr. Richard Rosales)

Dietary Evaluation for Care Gaps Study

(Shannon Carroll, RD)

Pharmacy & Oncology Nursing Study to Evaluate Long Wait Times for Chemotherapy

(Tyler Daugherty, RPh and Heather Askren, DNP, NP-C, RN, OCN))
